

Pittsfield (Somerset)

Pittsfield is a town in Somerset County with 643 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of endometrial cancer and anxiety disorder. However, they have higher rates of chronic kidney disease, chronic obstructive pulmonary disease (COPD), diabetes, and tobacco use disorder. Older residents in Somerset County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (77.6%) and annual dental exams (57.5%), while 39.3% of men and 43.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include five primary care providers, one hospital, and one public library.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		3,924	1,366,949
Population 60 years or older as % of total population		20.9%	29.4%
Total population 60 years and older		822	402,170
Population 65 years or older as % of total population		16.4%	21.5%
Total population 65 years and older		643	293,488
% 65-74 years		49.3%	59.9%
% 75-84 years		38.9%	28.5%
% 85 years or older		11.8%	11.6%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
