

Saco (York)

Saco is a town in York County with 3,520 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of glaucoma, heart attack, ischemic heart disease, and schizophrenia. However, they have higher rates of fibromyalgia/chronic pain/fatigue, substance use disorder, depression, and anxiety disorder. Older residents in York County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (78.1%) and annual dental exams (70%), while 53.8% of men and 40% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 23 primary care providers, one skilled nursing facility, one hospice agency, one adult day health center, one public library, and two assisted living facilities. Saco is a designated AARP Age-Friendly Community.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		20,446	1,366,949
Population 60 years or older as % of total population		25.9%	29.4%
Total population 60 years and older		5,287	402,170
Population 65 years or older as % of total population		17.2%	21.5%
Total population 65 years and older		3,520	293,488
% 65-74 years		60.8%	59.9%
% 75-84 years		26.9%	28.5%
% 85 years or older		12.3%	11.6%
% 65+ population who are female		53.4%	54.3%
% 85+ population who are female		70.4%	64.8%
Race and ethnicity of the population 65+			
% White		97.5%	96.6%
% African American		0.0%	0.3%
% Asian		0.0%	0.5%
% Other race(s)		2.5%	2.5%
% Hispanic		0.0%	0.7%
# 55+ who are Native American / Alaskan		0	1,794

% 65+ hospice users	*	3.7%	3.0%
% 65+ hospice users as % of decedents		53.5%	49.7%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
