

## Thomaston (Knox)

Thomaston is a town in Knox County with 814 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of anemia, chronic kidney disease, diabetes, lung cancer, and pressure ulcer. Older residents in Knox County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (78%) and annual dental exams (70.3%), while 48.3% of men and 39% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include a public library. Thomaston is a designated AARP Age-Friendly Community.

### POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		2,753	1,366,949
Population 60 years or older as % of total population		43.6%	29.4%
Total population 60 years and older		1,199	402,170
Population 65 years or older as % of total population		29.6%	21.5%
Total population 65 years and older		814	293,488
% 65-74 years		72.7%	59.9%
% 75-84 years		20.6%	28.5%
% 85 years or older		6.6%	11.6%
% 65+ population who are female		69.2%	54.3%
% 85+ population who are female		70.4%	64.8%
Race and ethnicity of the population 65+			
% White		97.9%	96.6%
% African American		0.0%	0.3%
% Asian		0.0%	0.5%
% Other race(s)		2.1%	2.5%
% Hispanic		2.1%	0.7%
# 55+ who are Native American / Alaskan		0	1,794
Marital status of the population 65+			
% married		61.8%	57.0%

% 65+ getting Medicaid long term services and supports	*	1.4%	2.1%
% 65+ hospice users		2.4%	3.0%
% 65+ hospice users as % of decedents		47.9%	49.7%

NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](https://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
