

Turner (Androscoggin)

Turner is a town in Androscoggin County with 1,495 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of anemia, asthma, chronic obstructive pulmonary disease (COPD), osteoarthritis/rheumatoid arthritis, depression, and anxiety disorder. However, they have a higher rate of schizophrenia. Older residents in Androscoggin County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (78.3%) and annual dental exams (58.9%), while 47.4% of men and 33.9% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include two primary care providers, one community health center, and a public library.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		5,822	1,366,949
Population 60 years or older as % of total population		34.0%	29.4%
Total population 60 years and older		1,979	402,170
Population 65 years or older as % of total population		25.7%	21.5%
Total population 65 years and older		1,495	293,488
% 65-74 years	*	53.8%	59.9%
% 75-84 years		37.4%	28.5%
% 85 years or older		8.8%	11.6%
% 65+ population who are female		59.1%	54.3%
% 85+ population who are female		91.6%	64.8%
Race and ethnicity of the population 65+			
% White		98.6%	96.6%
% African American		0.0%	0.3%
% Asian		0.7%	0.5%
% Other race(s)		0.7%	2.5%
% Hispanic		2.9%	0.7%
# 55+ who are Native American / Alaskan		0	1,794

% 65+ hospice users	3.7%	3.0%
% 65+ hospice users as % of decedents	55.0%	49.7%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
