

## Waterville (Kennebec)

Waterville is a city in Kennebec County with 2,809 residents aged 65 and older. Compared to state average rates, older residents fare worse on some healthy aging indicators with higher rates of Alzheimer's disease, anemia, asthma, cataract, chronic kidney disease, COPD, congestive heart failure (CHF), fibromyalgia/chronic pain/fatigue, glaucoma, hypertension, ischemic heart disease, peripheral vascular disease, stroke, substance and tobacco use disorders, depression, anxiety disorder, and schizophrenia. Older residents in Kennebec County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (77.7%) and annual dental exams (67.3%), while 53.7% of men and 41% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 107 primary care providers, one hospital, a home health agency, three skilled nursing facilities, one hospice agency, one adult day health center, and a public library. Waterville is a designated AARP Age-Friendly Community.

### POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		15,785	1,366,949
Population 60 years or older as % of total population		24.6%	29.4%
Total population 60 years and older		3,881	402,170
Population 65 years or older as % of total population		17.8%	21.5%
Total population 65 years and older		2,809	293,488
% 65-74 years		56.2%	59.9%
% 75-84 years		24.9%	28.5%
% 85 years or older		18.9%	11.6%
% 65+ population who are female	*	64.0%	54.3%
% 85+ population who are female	*	76.1%	64.8%
Race and ethnicity of the population 65+			
% White		95.9%	96.6%
% African American		1.0%	0.3%
% Asian		1.5%	0.5%
% Other race(s)		1.5%	2.5%
% Hispanic		0.6%	0.7%
# 55+ who are Native American / Alaskan		14	1,794

% 65+ hospice users as % of decedents		50.6%	49.7%

## NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](https://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
