

## Wayne (Kennebec)

Wayne is a town in Kennebec County with 298 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of asthma, benign prostatic hyperplasia, cataract, and hypertension. However, they have a higher rate of schizophrenia. Older residents in Kennebec County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (77.7%) and annual dental exams (67.3%), while 53.7% of men and 41% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library. Wayne is a designated AARP Age-Friendly Community.

### POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		1,069	1,366,949
Population 60 years or older as % of total population		34.3%	29.4%
Total population 60 years and older		367	402,170
Population 65 years or older as % of total population		27.9%	21.5%
Total population 65 years and older		298	293,488
% 65-74 years	*	39.9%	59.9%
% 75-84 years	*	55.4%	28.5%
% 85 years or older	*	4.7%	11.6%
% 65+ population who are female		51.0%	54.3%
% 85+ population who are female		85.7%	64.8%
Race and ethnicity of the population 65+			
% White		95.0%	96.6%
% African American		0.0%	0.3%
% Asian		0.0%	0.5%
% Other race(s)		5.0%	2.5%
% Hispanic		4.4%	0.7%
# 55+ who are Native American / Alaskan		0	1,794
Marital status of the population 65+			
% married		56.4%	57.0%
% divorced/separated		15.1%	16.9%
% widowed		23.5%	20.6%
% never married		5.0%	5.6%
Education of the population 65+			
% with less than high school education		5.0%	7.6%
% with high school or some college	*	44.3%	59.0%
% with college degree		24.8%	18.3%
% with graduate or professional degree	*	25.8%	15.1%
% 65+ population who speak only English at home		91.9%	92.7%
% 65+ population who are veterans of military service		11.7%	18.4%

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
<b>HOUSING</b>			
% 65+ population who live alone		22.8%	28.3%
Average household size (all ages)		2.1	2.3

% 65+ hospice users		2.5%	3.0%
% 65+ hospice users as % of decedents	*	61.3%	49.7%

NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](https://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
