

Westbrook (Cumberland)

Westbrook is a city in Cumberland County with 3,617 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of benign prostatic hyperplasia and colon cancer. However, they have higher rates of chronic kidney disease, congestive heart failure (CHF), diabetes, hypertension, osteoarthritis/rheumatoid arthritis, osteoporosis, peripheral vascular disease, pressure ulcer, substance and tobacco use disorders, depression, and anxiety disorder. Older residents in Cumberland County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (77.5%) and annual dental exams (73.2%), while 54.5% of men and 43.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 82 primary care providers, one hospital, one skilled nursing facility, five community health centers, one adult day health center, and a public library.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		20,339	1,366,949
Population 60 years or older as % of total population		23.9%	29.4%
Total population 60 years and older		4,864	402,170
Population 65 years or older as % of total population		17.8%	21.5%
Total population 65 years and older		3,617	293,488
% 65-74 years		57.8%	59.9%
% 75-84 years		25.4%	28.5%
% 85 years or older		16.8%	11.6%
% 65+ population who are female		55.9%	54.3%
% 85+ population who are female	*	48.4%	64.8%

% 65+ hospice users as % of decedents		54.0%	49.7%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
