Windham (Cumberland)

Windham is a town in Cumberland County with 2,936 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of anemia, benign prostatic hyperplasia, colon cancer, heart attack, ischemic heart disease, and osteoporosis. Older residents in Cumberland County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (77.5%) and annual dental exams (73.2%), while 54.5% of men and 43.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 17 primary care providers, one skilled nursing facility, and a public library. Windham is a designated AARP Age-Friendly Community.

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
