

Bath, West Bath (Sagadahoc)

The town and city of Bath and West Bath are located in Sagadahoc County. Collectively, these areas are home to 2,511 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of high cholesterol, anemia, asthma, congestive heart failure (CHF), diabetes, fibromyalgia/chronic pain/fatigue, hypertension, tobacco use disorder, and anxiety disorder. Older residents in Sagadahoc County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (78.2%) and annual dental exams (68.6%), while 52% of men and 48.3% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include one primary care provider, one skilled nursing facility, one adult day health center, one senior center, one public university or community college, and one public library. Bath is a designated AARP Age-Friendly Community.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		10,956	1,366,949
Population 60 years or older as % of total population		30.4%	29.4%
Total population 60 years and older		3,331	402,170
Population 65 years or older as % of total population		22.9%	21.5%
Total population 65 years and older		2,511	293,488
% 65-74 years		61.4%	59.9%
% 75-84 years		31.3%	28.5%
% 85 years or older		7.3%	11.6%
% 65+ population who are female		57.3%	54.3%
% 85+ population who are female		54.6%	64.8%
Race and ethnicity of the population 65+			
% White		99.6%	96.6%
% African American		0.4%	0.3%
% Asian		0.0%	0.5%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
