

Beals, Jonesport (Washington)

The communities of Beals and Jonesport are located in Washington County. Collectively, these areas are home to 463 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of osteoarthritis/rheumatoid arthritis, stroke, and depression. However, they have higher rates of anemia, colon cancer, diabetes, glaucoma, and hypertension. Older residents in Washington County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (80%) and annual dental exams (57.5%), while 51.6% of men and 42.1% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		1,719	1,366,949
Population 60 years or older as % of total population		36.6%	29.4%
Total population 60 years and older		629	402,170

## NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](https://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
