

Beaver Cove, Greenville, Northeast Piscataquis, Northwest Piscataquis (Piscataquis)

The communities of Beaver Cove, Greenville, Northeast Piscataquis, and Northwest Piscataquis are located in Piscataquis County. Collectively, these areas are home to 934 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of congestive heart failure (CHF), fibromyalgia/chronic pain/fatigue, ischemic heart disease, osteoporosis, and depression. However, they have higher rates of peripheral vascular disease and PTSD. Older residents in Piscataquis County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (79.3%) and annual dental exams (60.8%), while 40.8% of men and 38.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include two primary care providers, one hospital, and one public library. Greenville is a designated AARP Age-Friendly Community.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		2,758	1,366,949
Population 60 years or older as % of total population		48.0%	29.4%
Total population 60 years and older		1,324	402,170
Population 65 years or older as % of total population		33.9%	21.5%
Total population 65 years and older		934	293,488
% 65-74 years		61.0%	59.9%
% 75-84 years		30.0%	28.5%
% 85 years or older		9.0%	11.6%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
