

## Belfast, Swanville, Waldo (Waldo)

The towns and cities of Belfast, Swanville, and Waldo are located in Waldo County. Collectively, these areas are home to 2,921 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of high cholesterol, peripheral vascular disease, tobacco use disorder, and schizophrenia. However, they have higher rates of cataract and ischemic heart disease. Older residents in Waldo County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (75.5%) and annual dental exams (63.1%), while 46.5% of men and 44.8% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 19 primary care providers, one hospital, two skilled nursing facilities, one community health center, two adult day health centers, one public university or community college, and one public library. Belfast, Swanville, and Waldo are designated AARP Age-Friendly Communities.

### POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		9,078	1,366,949
Population 60 years or older as % of total population		44.7%	29.4%
Total population 60 years and older		4,058	402,170
Population 65 years or older as % of total population		32.2%	21.5%
Total population 65 years and older		2,921	293,488
% 65-74 years		65.0%	59.9%
% 75-84 years		27.1%	28.5%
% 85 years or older		7.9%	11.6%
% 65+ population who are female		55.9%	54.3%
% 85+ population who are female		77.0%	64.8%
Race and ethnicity of the population 65+			
% White		97.6%	96.6%
% African American		0.0%	0.3%
% Asian		0.4%	0.5%
% Other race(s)		2.0%	2.5%
% Hispanic		0.8%	0.7%
# 55+ who are Native American / Alaskan		17	1,794
Marital status of the population 65+			
% married		63.7%	57.0%
% divorced/separated		15.0%	16.9%
% widowed		14.8%	20.6%
% never married		6.6%	5.6%
Education of the population 65+			
% with less than high school education		6.6%	7.6%

% 65+ getting Medicaid long term services and supports	*	1.6%	2.1%
% 65+ hospice users		3.2%	3.0%
% 65+ hospice users as % of decedents		50.1%	49.7%

## NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](https://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
