

Blue Hill (Hancock)

Blue Hill is a town in Hancock County with 626 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of hip fracture, high cholesterol, chronic kidney disease, chronic obstructive pulmonary disease (COPD), diabetes, hypertension, ischemic heart disease, peripheral vascular disease, pressure ulcer, tobacco use disorder, and schizophrenia. However, they have a higher rate of glaucoma. Older residents in Hancock County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (78.4%) and annual dental exams (68.8%), while 49.7% of men and 42.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include one primary care provider, one hospital, one adult day health center, and two public libraries. Blue Hill is a designated AARP Age-Friendly Community.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		2,797	1,366,949
Population 60 years or older as % of total population		25.3%	29.4%
Total population 60 years and older		709	402,170
Population 65 years or older as % of total population		22.4%	21.5%
Total population 65 years and older		626	293,488
% 65-74 years		47.9%	59.9%
% 75-84 years		29.6%	28.5%
% 85 years or older		22.5%	11.6%

% 65+ hospice users		2.4%	3.0%
% 65+ hospice users as % of decedents		56.9%	49.7%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
