Bristol, Louds Island, Monhegan, South Bristol (Lincoln)

The communities of Bristol, Louds Island, Monhegan, and South Bristol are located in Lincoln County. Collectively, these areas are home to 1,474 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of hip fracture, high cholesterol, Alzheimer's disease or related dementias, anemia, asthma, atrial fibrillation, chronic obstructive pulmonary disease (COPD), diabetes, fibromyalgia/chronic pain/fatigue, heart attack, hypertension, ischemic heart disease, peripheral vascular disease, stroke, tobacco use disorder, anxiety disorder, PTSD, and schizophrenia. However, they have higher rates of cataract and glaucoma. Older residents in Lincoln County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (76.4%) and annual dental exams (70%), while 53.5% of men and 41.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include three public libraries.

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
