

Camden (Knox)

Camden is a town in Knox County with 1,795 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of chronic kidney disease, chronic obstructive pulmonary disease (COPD), diabetes, heart attack, hypertension, ischemic heart disease, liver disease, lung cancer, and substance and tobacco use disorders. However, they have higher rates of hip fracture, cataract, glaucoma, osteoporosis, and prostate cancer. Older residents in Knox County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (78%) and annual dental exams (70.3%), while 48.3% of men and 39% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include three primary care providers, two skilled nursing facilities, one public library, one assisted living, and one Alzheimer's disease support group. Camden is a designated AARP Age-Friendly Community.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		5,221	1,366,949
Population 60 years or older as % of total population		42.1%	29.4%
Total population 60 years and older		2,200	402,170
Population 65 years or older as % of total population		34.4%	21.5%
Total population 65 years and older		1,795	293,488
% 65-74 years		49.7%	59.9%
% 75-84 years	*	41.6%	28.5%
% 85 years or older		8.7%	11.6%
% 65+ population who are female		53.7%	54.3%
% 85+ population who are female		66.0%	64.8%
Race and ethnicity of the population 65+			
% White		99.3%	96.6%
% African American		0.0%	0.3%
% Asian		0.0%	0.5%
% Other race(s)		0.7%	2.5%
% Hispanic		0.0%	0.7%
# 55+ who are Native American / Alaskan		0	1,794

NOTES

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
