

## Central Aroostook, Dyer Brook, Hammond, Hersey, Ludlow, Merrill, Moro, Oakfield, Smyrna (Aroostook)

The communities of Central Aroostook, Dyer Brook, Hammond, Hersey, Ludlow, Merrill, Moro, Oakfield, and Smyrna are located in Aroostook County. Collectively, these areas are home to 517 residents aged 65 and older. Compared to state average rates, older residents have a lower rate of breast cancer. However, they have higher rates of colon cancer, liver disease, and schizophrenia. Older residents in Aroostook County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (81.1%) and annual dental exams (59.8%), while 43.1% of men and 36% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their community health center.

### POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		2,397	1,366,949
Population 60 years or older as % of total population		32.3%	29.4%
Total population 60 years and older		774	402,170
Population 65 years or older as % of total population		21.6%	21.5%
Total population 65 years and older		517	293,488
% 65-74 years		66.3%	59.9%
% 75-84 years		19.9%	28.5%
% 85 years or older		13.7%	11.6%
% 65+ population who are female		54.5%	54.3%
% 85+ population who are female		74.6%	64.8%
Race and ethnicity of the population 65+			
% White		98.3%	96.6%
% African American		0.0%	0.3%
% Asian		0.0%	0.5%
% Other race(s)		1.7%	2.5%
% Hispanic		0.0%	0.7%
# 55+ who are Native American / Alaskan		13	1,794

% 65+ hospice users		2.3%	3.0%
% 65+ hospice users as % of decedents		42.1%	49.7%

NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](https://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
