

## Clifton, Eddington (Penobscot)

The communities of Clifton and Eddington are located in Penobscot County. Collectively, these areas are home to 675 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of Alzheimer's disease or related dementias, chronic kidney disease, and diabetes. However, they have higher rates of glaucoma, lung cancer, and PTSD. Older residents in Penobscot County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (78.3%) and annual dental exams (58.3%), while 47.7% of men and 40.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings.

### POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		3,500	1,366,949
Population 60 years or older as % of total population		30.1%	29.4%
Total population 60 years and older		1,052	402,170
Population 65 years or older as % of total population		19.3%	21.5%
Total population 65 years and older		675	293,488
% 65-74 years		55.7%	59.9%
% 75-84 years		32.9%	28.5%
% 85 years or older		11.4%	11.6%
% 65+ population who are female		54.7%	54.3%
% 85+ population who are female		59.7%	64.8%
Race and ethnicity of the population 65+			
% White		99.1%	96.6%
% African American		0.0%	0.3%
% Asian		0.0%	0.5%
% Other race(s)		0.9%	2.5%
% Hispanic		1.8%	0.7%
# 55+ who are Native American / Alaskan		0	1,794

## NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](https://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
