

Hampstead (Rockingham)

Hampstead is a town in Rockingham County with 1,849 residents aged 65 or older. Compared to state average rates, older residents have higher rates of high cholesterol, anemia, asthma, benign prostatic hyperplasia, cataract, chronic kidney disease, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), fibromyalgia/chronic pain/fatigue, glaucoma, heart attack, hypertension, ischemic heart disease, osteoarthritis/rheumatoid arthritis, peripheral vascular disease, and prostate cancer. Older residents in Rockingham County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (75.2%) and annual dental exams (74.3%), while 48.6% of men and 41.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include one primary care provider, one hospital, one adult day health center, one senior center, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		9,018	1,379,610

% 65+ hospice users		3.0%	2.7%
% 65+ hospice users as % of decedents		54.4%	47.1%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
