

Hampton Falls (Rockingham)

Hampton Falls is a town in Rockingham County with 493 residents aged 65 or older. Compared to state average rates, older residents have a lower rate of glaucoma. However, they have higher rates of liver disease and osteoarthritis/rheumatoid arthritis. Older residents in Rockingham County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (75.2%) and annual dental exams (74.3%), while 48.6% of men and 41.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
