

## Atkinson (Rockingham)

Atkinson is a town in Rockingham County with 1,722 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of chronic obstructive pulmonary disease (COPD), substance use disorder, and PTSD. However, they have higher rates of high cholesterol, anemia, benign prostatic hyperplasia, cataract, chronic kidney disease, glaucoma, hypertension, osteoarthritis/rheumatoid arthritis, and anxiety disorder. Older residents in Rockingham County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (75.2%) and annual dental exams (74.3%), while 48.6% of men and 41.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

## NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](http://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
