

Littleton (Grafton)

Littleton is a town in Grafton County with 1,346 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of chronic kidney disease, fibromyalgia/chronic pain/fatigue, hypertension, liver disease, lung cancer, osteoarthritis/rheumatoid arthritis, prostate cancer, anxiety disorder, and high cholesterol. However, they have a higher rate of cataract. Older residents in Grafton County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (70.4%) and annual dental exams (67.2%), while 48.6% of men and 42.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 11 primary care providers, one hospital, one home health agency, one hospice agency, two community health centers, one senior center, one public university or community college, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		6,021	1,379,610
Population 60 years or older as % of total population		32.8%	26.7%
Total population 60 years and older		1,973	368,151
Population 65 years or older as % of total population		22.4%	19.0%
Total population 65 years and older		1,346	261,749
% 65-74 years		57.4%	60.7%
% 75-84 years		22.8%	28.0%
% 85 years or older		19.8%	11.3%
% 65+ population who are female		62.0%	53.9%
% 85+ population who are female		76.3%	64.0%
Race and ethnicity of the population 65+			
% White		98.4%	95.7%

% 65+ hospice users	*	1.7%	2.7%
% 65+ hospice users as % of decedents		41.1%	47.1%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
