Newfields (Rockingham)

Newfields is a town in Rockingham County with 230 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of hip fracture, Alzheimer's disease or related dementias, anemia, cataract, chronic kidney disease, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), diabetes, hypertension, ischemic heart disease, peripheral vascular disease, pressure ulcer, stroke, tobacco use disorder, depression, and schizophrenia. However, they have a higher rate of breast cancer. Older residents in Rockingham County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (75.2%) and annual dental exams (74.3%), while 48.6% of men and 41.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

NOTES			

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are <a href="https://no.com/no.co
