

## Plaistow (Rockingham)

Plaistow is a town in Rockingham County with 1,327 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of atrial fibrillation, pressure ulcer, and PTSD. However, they have higher rates of high cholesterol, anemia, benign prostatic hyperplasia, diabetes, and hypertension. Older residents in Rockingham County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (75.2%) and annual dental exams (74.3%), while 48.6% of men and 41.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 11 primary care providers, one hospice agency, one senior center, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		7,843	1,379,610
Population 60 years or older as % of total population		24.8%	26.7%
Total population 60 years and older		1,945	368,151
Population 65 years or older as % of total population		16.9%	19.0%
Total population 65 years and older		1,327	261,749
% 65-74 years		70.3%	60.7%
% 75-84 years	*	15.4%	28.0%
% 85 years or older		14.3%	11.3%
% 65+ population who are female		51.2%	53.9%
% 85+ population who are female		51.6%	64.0%
Race and ethnicity of the population 65+			
% White		96.2%	95.7%
% African American		0.0%	0.6%
% Asian		0.4%	1.3%
% Other race(s)		3.4%	2.3%
% Hispanic		0.0%	1.1%
# 55+ who are Native American / Alaskan		0	549
Marital status of the population 65+			
% married		53.1%	58.5%
% divorced/separated		20.5%	16.5%
% widowed		21.5%	20.0%

% 65+ getting Medicaid long term services and supports	*	1.9%	2.7%
% 65+ hospice users		2.7%	2.7%
% 65+ hospice users as % of decedents		53.2%	47.1%

## NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](http://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
