

Portsmouth (Rockingham)

Portsmouth is a city in Rockingham County with 4,479 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of cataract, chronic kidney disease, congestive heart failure (CHF), diabetes, and tobacco use disorder. However, they have higher rates of hip fracture, benign prostatic hyperplasia, glaucoma, migraine, osteoporosis, prostate cancer, and PTSD. Older residents in Rockingham County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (75.2%) and annual dental exams (74.3%), while 48.6% of men and 41.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 104 primary care providers, one hospital, two skilled nursing facilities, two community health centers, one senior center, two assisted living facilities, one public university or community college, and one public library. Portsmouth is a designated AARP Age-Friendly Community.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		22,138	1,379,610
Population 60 years or older as % of total population		27.8%	26.7%
Total population 60 years and older		6,165	368,151
Population 65 years or older as % of total population		20.2%	19.0%
Total population 65 years and older		4,479	261,749
% 65-74 years		54.6%	60.7%
% 75-84 years		32.9%	28.0%
% 85 years or older		12.5%	11.3%
% 65+ population who are female		58.1%	53.9%
% 85+ population who are female		72.5%	64.0%
Race and ethnicity of the population 65+			
% White	*	86.6%	95.7%
% African American		2.7%	0.6%
% Asian		1.5%	1.3%
% Other race(s)		9.2%	2.3%
% Hispanic		1.8%	1.1%
# 55+ who are Native American / Alaskan		10	549
Marital status of the population 65+

% 65+ hospice users		3.3%	2.7%
% 65+ hospice users as % of decedents		51.8%	47.1%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
