

Richmond (Cheshire)

Richmond is a town in Cheshire County with 319 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of high cholesterol, benign prostatic hyperplasia, migraine, and schizophrenia. However, they have higher rates of Alzheimer's disease or related dementias, chronic obstructive pulmonary disease (COPD), fibromyalgia/chronic pain/fatigue, and tobacco use disorder. Older residents in Cheshire County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (66.3%) and annual dental exams (65.5%), while 50.1% of men and 41.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		1,107	1,379,610
Population 60 years or older as % of total population		40.6%	26.7%
Total population 60 years and older		449	368,151
Population 65 years or older as % of total population		28.8%	19.0%
Total population 65 years and older		319	261,749
% 65-74 years		67.1%	60.7%
% 75-84 years		18.5%	28.0%
% 85 years or older		14.4%	11.3%
% 65+ population who are female		45.8%	53.9%
% 85+ population who are female		54.3%	64.0%
Race and ethnicity of the population 65+			
% White		97.8%	95.7%
% African American		0.0%	0.6%
% Asian		0.0%	1.3%
% Other race(s)		2.2%	2.3%
% Hispanic		1.9%	1.1%
# 55+ who are Native American / Alaskan		0	549
Marital status of the population 65+			
% married	*	40.1%	58.5%

% 65+ getting Medicaid long term services and supports		3.0%	2.7%
% 65+ hospice users		2.2%	2.7%
% 65+ hospice users as % of decedents		39.8%	47.1%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
