

Rollinsford (Strafford)

Rollinsford is a town in Strafford County with 463 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of cataract and tobacco use disorder. However, they have a higher rate of glaucoma. Older residents in Strafford County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (72.8%) and annual dental exams (67.4%), while 48.3% of men and 38.4% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		2,597	1,379,610
Population 60 years or older as % of total population		24.8%	26.7%
Total population 60 years and older		643	368,151
Population 65 years or older as % of total population		17.8%	19.0%
Total population 65 years and older		463	261,749
% 65-74 years	*	43.8%	60.7%
% 75-84 years	*	50.3%	28.0%
% 85 years or older	*	5.8%	11.3%
% 65+ population who are female		64.6%	53.9%
% 85+ population who are female		55.6%	64.0%
Race and ethnicity of the population 65+			
% White		97.6%	95.7%

% 65+ hospice users		3.2%	2.7%
% 65+ hospice users as % of decedents	*	58.3%	47.1%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
