

Shelburne (Coös)

Shelburne is a town in Coös County with 182 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of anemia, benign prostatic hyperplasia, breast cancer, chronic kidney disease, liver disease, osteoporosis, depression, and anxiety disorder. However, they have higher rates of congestive heart failure (CHF) and heart attack. Older residents in Coös County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (74.3%) and annual dental exams (56.9%), while 46.2% of men and 35% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		550	1,379,610
Population 60 years or older as % of total population		41.6%	26.7%
Total population 60 years and older		229	368,151
Population 65 years or older as % of total population		33.1%	19.0%
Total population 65 years and older		182	261,749
% 65-74 years	*	48.9%	60.7%
% 75-84 years		39.6%	28.0%
% 85 years or older		11.5%	11.3%
% 65+ population who are female		40.7%	53.9%
% 85+ population who are female		28.6%	64.0%
Race and ethnicity of the population 65+			
% White		100.0%	95.7%
% African American		0.0%	0.6%
% Asian		0.0%	1.3%
% Other race(s)		0.0%	2.3%

% 65+ hospice users		2.5%	2.7%
% 65+ hospice users as % of decedents	*	31.3%	47.1%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
