

Belmont (Belknap)

Belmont is a town in Belknap County with 1,594 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of anemia, cataract, fibromyalgia/chronic pain/fatigue, glaucoma, migraine, osteoporosis, and anxiety disorder. However, they have higher rates of chronic obstructive pulmonary disease (COPD), heart attack, hypertension, peripheral vascular disease, and substance and tobacco use disorders. Older residents in Belknap County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (72.6%) and annual dental exams (66.4%), while 50% of men and 41.4% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include five primary care providers and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		7,358	1,379,610
Population 60 years or older as % of total population		29.9%	26.7%
Total population 60 years and older		2,201	368,151
Population 65 years or older as % of total population		21.7%	19.0%
Total population 65 years and older		1,594	261,749
% 65-74 years		65.1%	60.7%
% 75-84 years		26.3%	28.0%
% 85 years or older		8.5%	11.3%
% 65+ population who are female		61.4%	53.9%
% 85+ population who are female		78.7%	64.0%
Race and ethnicity of the population 65+			
% White		100.0%	95.7%

% 65+ hospice users		2.2%	2.7%
% 65+ hospice users as % of decedents		41.9%	47.1%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
