

Surry (Cheshire)

Surry is a town in Cheshire County with 243 residents aged 65 or older. Compared to state average rates, older residents fare worse on some healthy aging indicators with higher rates of high cholesterol, Alzheimer's disease or related dementias, anemia, cataract, congestive heart failure (CHF), fibromyalgia/chronic pain/fatigue, osteoarthritis/rheumatoid arthritis, osteoporosis, peripheral vascular disease, pressure ulcer, stroke, and depression. Older residents in Cheshire County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (66.3%) and annual dental exams (65.5%), while 50.1% of men and 41.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		950	1,379,610
Population 60 years or older as % of total population		30.5%	26.7%
Total population 60 years and older		290	368,151
Population 65 years or older as % of total population		25.6%	19.0%
Total population 65 years and older		243	261,749
% 65-74 years		62.6%	60.7%
% 75-84 years		25.1%	28.0%
% 85 years or older		12.3%	11.3%
% 65+ population who are female		49.0%	53.9%
% 85+ population who are female		46.7%	64.0%
Race and ethnicity of the population 65+			
% White	*	98.8%	95.7%
% African American		0.0%	0.6%
% Asian		0.0%	1.3%

# skilled nursing home Medicare beds/1000 persons 65+ years		0.0	26.1
% 65+ getting Medicaid long term services and supports	*	3.4%	2.7%
% 65+ hospice users		2.8%	2.7%
% 65+ hospice users as % of decedents		45.1%	47.1%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
