

Tamworth (Carroll)

Tamworth is a town in Carroll County with 574 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of Alzheimer's disease or related dementias, benign prostatic hyperplasia, chronic kidney disease, ischemic heart disease, migraine, pressure ulcer, prostate cancer, and schizophrenia. Older residents in Carroll County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (74.6%) and annual dental exams (66.3%), while 53.8% of men and 40.9% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include one primary care provider and one public library. Tamworth is a designated AARP Age-Friendly Community.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		2,844	1,379,610

% 65+ getting Medicaid long term services and supports	*	1.0%	2.7%
% 65+ hospice users	*	2.1%	2.7%
% 65+ hospice users as % of decedents		50.9%	47.1%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
