

Waterville Valley (Grafton)

Waterville Valley is a town in Grafton County with 93 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of Alzheimer's disease or related dementias, chronic kidney disease, chronic obstructive pulmonary disease (COPD), diabetes, fibromyalgia/chronic pain/fatigue, hypertension, liver disease, peripheral vascular disease, pressure ulcer, tobacco use disorder, depression, anxiety disorder, and schizophrenia. Older residents in Grafton County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (70.4%) and annual dental exams (67.2%), while 48.6% of men and 42.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		248	1,379,610
Population 60 years or older as % of total population		48.0%	26.7%
Total population 60 years and older		119	368,151
Population 65 years or older as % of total population		37.5%	19.0%
Total population 65 years and older		93	261,749
% 65-74 years		58.1%	60.7%
% 75-84 years		37.6%	28.0%
% 85 years or older		4.3%	11.3%
% 65+ population who are female		40.9%	53.9%
% 85+ population who are female		100.0%	64.0%
Race and ethnicity of the population 65+			
% White		90.3%	95.7%

% 65+ hospice users	*	2.1%	2.7%
% 65+ hospice users as % of decedents		42.3%	47.1%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
