

## Berlin (Coös)

Berlin is a city in Coös County with 1,811 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of benign prostatic hyperplasia and breast cancer. However, they have higher rates of high cholesterol, Alzheimer's disease or related dementias, chronic kidney disease, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), diabetes, heart attack, hypertension, peripheral vascular disease, stroke, and substance use disorder. Older residents in Coös County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (74.3%) and annual dental exams (56.9%), while 46.2% of men and 35% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 20 primary care providers, one hospital, two skilled nursing facilities, three community health centers, one senior center, one public university or community college, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		9,485	1,379,610
Population 60 years or older as % of total population		24.8%	26.7%
Total population 60 years and older		2,354	368,151
Population 65 years or older as % of total population		19.1%	19.0%
Total population 65 years and older		1,811	261,749
% 65-74 years		55.2%	60.7%
% 75-84 years		30.8%	28.0%
% 85 years or older		14.0%	11.3%
% 65+ population who are female		59.1%	53.9%
% 85+ population who are female	*	87.8%	64.0%
Race and ethnicity of the population 65+			
% White		97.4%	95.7%
% African American		0.0%	0.6%
% Asian		0.8%	1.3%
% Other race(s)		1.8%	2.3%
% Hispanic		0.0%	1.1%
# 55+ who are Native American / Alaskan		0	549
Marital status of the population 65+			
% married	*	43.2%	58.5%
% divorced/separated		23.5%	16.5%
% widowed	*	30.0%	20.0%
% never married		3.4%	5.1%
Education of the population 65+			
% with less than high school education	*	26.0%	8.1%
% with high school or some college		64.9%	56.3%
% with college degree	*	6.0%	19.6%
% with graduate or professional degree	*	3.1%	16.0%
% 65+ population who speak only English at home	*	73.6%	93.4%
% 65+ population who are veterans of military service		13.4%	18.0%

## POPULATION CHARACTERISTICS

% 65+ hospice users as % of decedents	*	31.3%	47.1%

## NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](http://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
