

## Nashua: Zip 03060 (Hillsborough)

Nashua Southeast is a neighborhood of Nashua in Hillsborough County with 4,895 residents aged 65 or older. Compared to state average rates, older residents have a lower rate of glaucoma. However, they have higher rates of high cholesterol, Alzheimer's disease, anemia, atrial fibrillation, chronic kidney disease, COPD, CHF, diabetes, fibromyalgia, heart attack, hypertension, ischemic heart disease, liver disease, osteoporosis, peripheral vascular disease, pressure ulcer, stroke, substance/tobacco use disorders, depression, anxiety disorder, and schizophrenia. Residents in Hillsborough County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (72.8%) and annual dental exams (69.8%), while 47.8% of men and 38.3% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources include 106 pcps, 2 hospitals, 1 home health agency, 1 skilled nursing facility, 1 assisted living, 1 public library, 7 community health centers, 2 senior centers, 1 public library, and an Alzheimer's caregiver support group.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate

% 65+ hospice users	*	3.5%	2.7%
% 65+ hospice users as % of decedents		42.4%	47.1%

## NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](http://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
