

Nashua: Zip 03062 (Hillsborough)

Nashua Southwest is a neighborhood of Nashua in Hillsborough County with 5,791 residents aged 65 or older. Compared to state average rates, older residents have a lower rate of PTSD. However, they have higher rates of high cholesterol, anemia, cataract, chronic kidney disease, colon cancer, congestive heart failure (CHF), diabetes, hypertension, ischemic heart disease, migraine, osteoporosis, stroke, and anxiety disorder. Older residents in Hillsborough County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (72.8%) and annual dental exams (69.8%), while 47.8% of men and 38.3% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 30 primary care providers, one home health agency, one skilled nursing facility, one community health center, an adult day health center, and three assisted living facilities.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
