

Danville (Rockingham)

Danville is a town in Rockingham County with 600 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of breast cancer and cataract. However, they have higher rates of atrial fibrillation, chronic kidney disease, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), and liver disease. Older residents in Rockingham County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (75.2%) and annual dental exams (74.3%), while 48.6% of men and 41.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		4,465	1,379,610
Population 60 years or older as % of total population		25.4%	26.7%
Total population 60 years and older		1,135	368,151
Population 65 years or older as % of total population		13.4%	19.0%
Total population 65 years and older		600	261,749
% 65-74 years		66.5%	60.7%
% 75-84 years		29.8%	28.0%
% 85 years or older	*	3.7%	11.3%
% 65+ population who are female		51.5%	53.9%
% 85+ population who are female		0.0%	64.0%
Race and ethnicity of the population 65+			
% White		92.3%	95.7%
% African American		0.0%	0.6%
% Asian		7.7%	1.3%
% Other race(s)		0.0%	2.3%
% Hispanic		0.0%	1.1%
# 55+ who are Native American / Alaskan		0	549
Marital status of the population 65+			
% married	*	71.2%	58.5%
% divorced/separated		11.3%	16.5%
% widowed		15.8%	20.0%
% never married		1.7%	5.1%
Education of the population 65+			
% with less than high school education		11.7%	8.1%

% 65+ with self-reported independent living difficulty		8.5%	10.1%
CAREGIVING			
# of Alzheimer's support groups		0	5
% grandparents raising grandchildren		3.28%	0.69%

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
