

Durham (Strafford)

Durham is a town in Strafford County with 1,464 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of chronic kidney disease, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), diabetes, peripheral vascular disease, substance and tobacco use disorders, and schizophrenia. However, they have higher rates of benign prostatic hyperplasia, cataract, fibromyalgia/chronic pain/fatigue, glaucoma, and osteoporosis. Older residents in Strafford County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (72.8%) and annual dental exams (67.4%), while 48.3% of men and 38.4% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include two primary care providers, one public university or community college, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		15,073	1,379,610

% 65+ hospice users		3.1%	2.7%
% 65+ hospice users as % of decedents		51.4%	47.1%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
