

Epsom (Merrimack)

Epsom is a town in Merrimack County with 992 residents aged 65 or older. Compared to state average rates, older residents have higher rates of atrial fibrillation, chronic kidney disease, hypertension, and tobacco use disorder. Older residents in Merrimack County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (73.2%) and annual dental exams (69.4%), while 52.5% of men and 46% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include three primary care providers, one skilled nursing facility, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		4,846	1,379,610

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
