

Fracestown (Hillsborough)

Fracestown is a town in Hillsborough County with 324 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of high cholesterol, Alzheimer's disease or related dementias, anemia, atrial fibrillation, chronic kidney disease, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), diabetes, hypertension, ischemic heart disease, liver disease, lung cancer, peripheral vascular disease, stroke, tobacco use disorder, depression, anxiety disorder, and schizophrenia. However, they have a higher rate of migraine. Older residents in Hillsborough County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (72.8%) and annual dental exams (69.8%), while 47.8% of men and 38.3% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		1,461	1,379,610
Population 60 years or older as % of total population		33.9%	26.7%
Total population 60 years and older		495	368,151
Population 65 years or older as % of total population		22.2%	19.0%
Total population 65 years and older		324	261,749
% 65-74 years		64.5%	60.7%
% 75-84 years		30.2%	28.0%
% 85 years or older		5.2%	11.3%
% 65+ population who are female		52.2%	53.9%
% 85+ population who are female		94.1%	64.0%
Race and ethnicity of the population 65+			
% White		98.1%	95.7%
% African American		0.9%	0.6%
% Asian		0.9%	1.3%
% Other race(s)		0.0%	2.3%
% Hispanic		1.5%	1.1%
# 55+ who are Native American / Alaskan		0	549
Marital status of the population 65+			
% married		65.4%	58.5%
% divorced/separated		10.5%	16.5%
% widowed		15.4%	20.0%
% never married		8.6%	5.1%
Education of the population 65+			
% with less than high school education		3.1%	8.1%

% 65+ hospice users	*	3.5%	2.7%
% 65+ hospice users as % of decedents		47.6%	47.1%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
