

## Fremont (Rockingham)

Fremont is a town in Rockingham County with 766 residents aged 65 or older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of asthma, cataract, and stroke. However, they have higher rates of hypertension, liver disease, anxiety disorder, and PTSD. Older residents in Rockingham County vary in obtaining preventive health screenings: residents 18 and older got annual physical exams (75.2%) and annual dental exams (74.3%), while 48.6% of men and 41.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include three primary care providers, one skilled nursing facility, and one public library.

<b>POPULATION CHARACTERISTICS</b>	<b>Significantly different than state rate</b>	<b>Community estimate</b>	<b>State estimate</b>
Total population (all ages)		4,738	1,379,610
Population 60 years or older as % of total population		23.3%	26.7%
Total population 60 years and older		1,105	368,151
Population 65 years or older as % of total population		16.2%	19.0%
Total population 65 years and older		766	261,749
% 65-74 years		56.0%	60.7%
% 75-84 years		27.2%	28.0%
% 85 years or older		16.8%	11.3%
% 65+ population who are female		49.7%	53.9%
% 85+ population who are female		72.1%	64.0%
Race and ethnicity of the population 65+			
% White		95.7%	95.7%
% African American		0.0%	0.6%

# skilled nursing home Medicare beds/1000 persons 65+ years		53.8	26.1
% 65+ getting Medicaid long term services and supports	*	2.0%	2.7%
% 65+ hospice users		2.9%	2.7%
% 65+ hospice users as % of decedents		54.5%	47.1%

## NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 New Hampshire Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](http://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
